## Do the Math!

Students are out of school for 82 days in the Summer  $\times 60$  minutes a day of math = 4,920 minutes

While an hour may not seem like much time, a well-spent 60 minutes of math time every day really does add up. More importantly, not doing math over summer vacation can make students rusty on math concepts they mastered in the previous year. Traditional math may seem boring for students when they are enjoying their summer, so take advantage of some great ways to make math fun.
