

THANK YOU
Wimberley Education Foundation!

What a fun new way to do all kinds of math skills and practice!

The second graders and the second grade teachers are super excited to “play” math learning games.

We couldn't do it without your wonderful support!

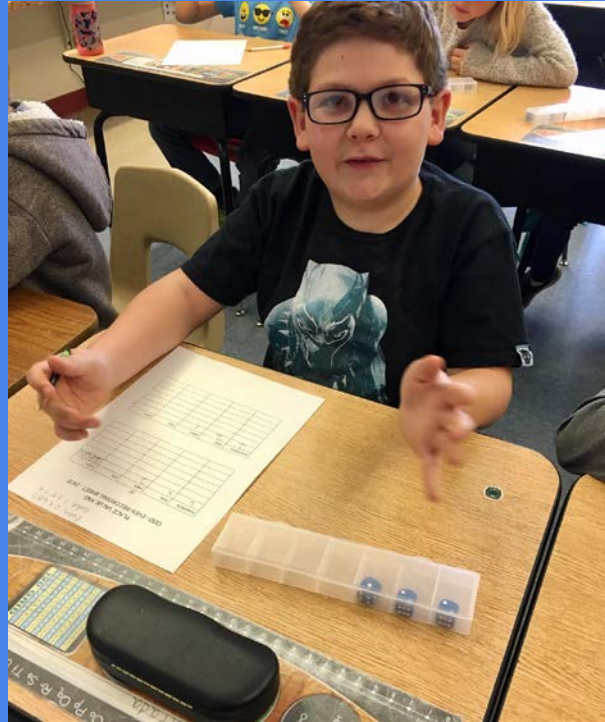

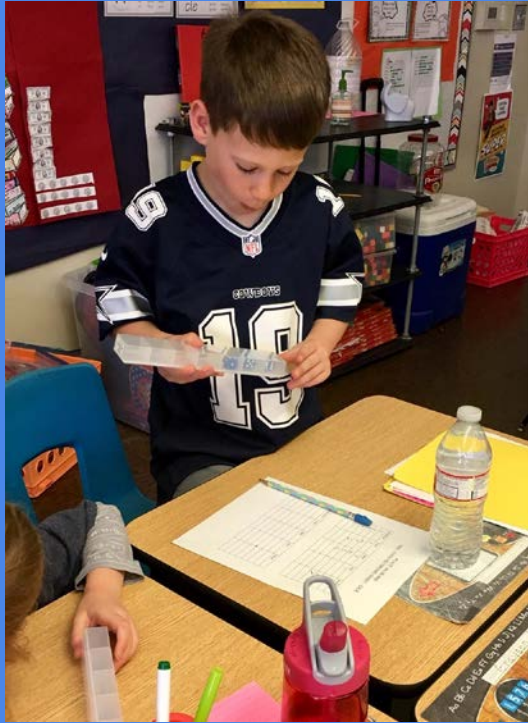

By: Erin Springs, Mel Summers

This is just a sampling of the cool stuff EACH second grade teacher got with our WEF grant! We can put these fun math manipulatives in each kiddos hand.

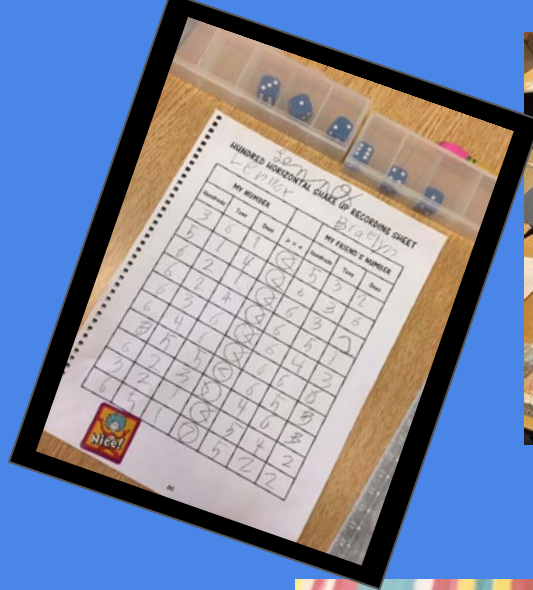

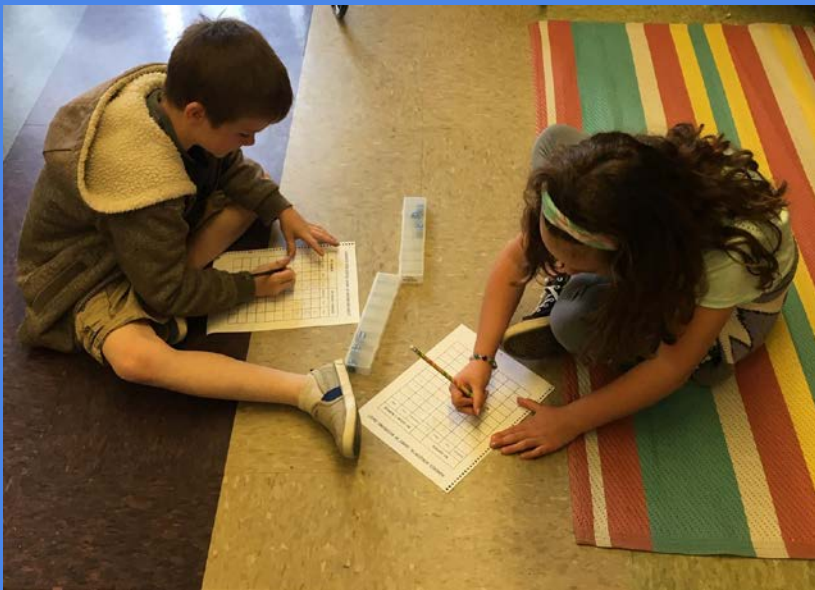

The kids are so engaged and having so much fun, that they don't know they are learning. WIN!

This was easy for everyone to participate! The cases kept the dice neatly in the boxes so they were not lost all over the floor.

The students are loving the shakers! They set up the shaker holders and then we did a review game of place value and odd/even numbers! They were so engaged!

This was one of the games provided by the set. It was super easy as the "recording sheet" was included in the book. Copy and go! They worked in partners to review comparing numbers! They were in major competition and LOVED it!
